

Social Media App

Project Plan

1. UI Design

- First of all, I have designed UI design for the Social Media application i.e., required pages (login, signup and main page) with html, CSS and bootstrap.

2. Login/Signup

- **Validation/Authentication**
 - In this phase I have made validations for forms and made authentication done using local storage.
- **Redirects**
 - In case someone accessed main page without login he/she will be redirect to login page

3. Fetching Data

- **In console**
 - Firstly, I have fetched data and displayed in console for APIs verification.
- **Mapping**
 - Then I have mapped data in main page.
- **Bottom Scroll**
 - Then made functionality for auto fetching more posts when reached bottom.

4. User Edit

- Made Bootstrap Modal for User Info edit/update.
